

Biographical Information

Robert L. Kane, DC, DABCT, FIACT brings over 15 years of experience in the field of thermal image interpretation.

Dr. Kane acquired his training through the International Thermographic Society and achieved Diplomate level certification through the American Board of Clinical Thermography (ABCT). He also achieved Diplomate certification through the International Academy of Clinical Thermology (IACT) and was recognized as a "Fellow" by IACT for contributions to the field of thermal imaging. Dr. Kane furthered his knowledge of breast applications under the tutelage of Dr. William Hobbins, one the world's leading authorities.

Dr. Kane frequently lectures to physicians and laypersons on the role of thermal imaging in the clinical practice while serving on the board of IACT and ABCT. He currently maintains a busy thermal imaging interpretation practice.
